451PT Framing System

Introduction

The thermally efficient 451PT Framing System was designed in close collaboration with Scape. The system meets the needs of the education, refurbishment and new build markets. It is also suitable for use on commercial projects in the public sector and is also ideal for large display windows in the retail sector.

The 451PT Framing System provides slimline, dual colour, and multi-glazed framing modules of varying widths and heights that feature fixed lights, opening vents and insulated panels.

Product Features and Benefits

- Meets the thermal requirements of current building regulations
- Narrow sightlines of 50mm ensures visually pleasing aesthetics

- Can be used for large window displays, an excellent tried and tested solution for retail applications
- Flush glazed therefore easy to apply
- Concealed drained therefore moisture infiltration directed to the outside of the building
- Suites with AA®720 and AA®540 Series Windows, AA®3610 Vertical Sliding Window and all Door Systems

Construction

The 451PT Framing System uses shear block construction where contoured shear blocks are screw fixed to the verticals, forming a spigot for horizontal members.

Glazing

Glazing options between 24mm and 28mm can be accommodated.

Independently Weather Performance Tested to BS 6375-1: 2015

	Air Infiltration BS EN 12207: 2000	Watertightness BS EN 12208: 2000	Wind Resistance BS EN 12210: 2000

AA®4001 Semi-unitised Framing System

Introduction

The AA®4001 Semi-unitised Framing System, designed in line with the DfE's 'Building Schools For The Future' is compliant with current building regulations, acoustics BB93 and environmentally friendly classrooms BB95.

As well as traditional stick build and semi-unitising, the system offers the advantage of fully unitised assembly and also enables it to meet the demands of fast track work schedules and restricted working conditions.

The AA®4001 Semi-unitised Framing System is adaptable to any new construction project, and due to the fact that it can be quickly installed in occupied buildings with minimal disturbance, the system is ideal for refurbishment projects.

Product Features and Benefits

- Semi-unitised fabrication and assembly in the factory ensures safer and faster installation off-site
- Selection of mullion and transom profiles ensure maximum flexibility in design

- One vent profile for both open in and open out options resulting in a streamlined offer
- Fixed bead offering good security
- Snap on glazing beads accommodates insulated panels up to 72mm
- Choice of internal and external bead glazing for fixed applications
- Concealed vent, top hung open out and bottom hung open in options are available offering optimum ventilation options

Construction

The AA®4001 Semi-unitised Framing System uses shear block construction and is a fully drained and pressure equalised system offering optimal weather performance. Concealed vents are cleated and crimped.

Glazing

Glazing options between 22mm and 38mm can be accommodated.

Independently Weather Performance Tested to BS 6375-1: 2015

	Air Infiltration BS EN 12207: 2000	Watertightness BS EN 12208: 2000	Wind Resistance BS EN 12210: 2000

A full range of guaranteed colours available

Kawneer Permacover™ is a high quality polyester powder paint finish, offering a wide range of solid and metallic colours providing outstanding resistance to environmental conditions. Kawneer Permacover™ has a 15 year gloss and 30 year matt and metallic guarantees subject to application and Kawneer acceptance in marine, industrial, swimming pools or other aggressive atmospheres.

To ensure the highest quality finish, powder coating is carried out in house as part of our single-source responsibility.

Kawneer Permanodic® is a range of subtle anodised colours which have been specifically developed for architectural glazing systems. Kawneer Permanodic® is a tried and tested anodising process, proven in accelerated laboratory tests, extensive field trials and contract experience. Subject to compliance with Kawneer's requirements, a 25 year finishes guarantee can be obtained.

Project Assistance

Kawneer's regionally based team of Architectural Advisers and the Architectural Services Team based at our Head Office in Runcorn are able to provide project advice and support:

Tel: 01928 502604 / Fax: 01928 502512
