

## PROJECT NEWS

## KAWNEER HELPS IN CREATING A VIBRANT NEW NEIGHBOURHOOD

### VISION

As part of the broader regeneration plan in the northwest of Birmingham, Plot 6 at the Perry Barr Residential Scheme, is one of the largest developments.

Providing 268 residential apartments, the eight-storey, mixed-use building also has a large courtyard garden, rooftop gardens and parking facilities for its residents. The living space has been created by blending modern architecture with traditional values.

### TRANSFORMATION

To achieve their vision, Glancy Nicholls Architects specified a range of Kawneer's market-leading, architectural aluminium glazing systems for the residential scheme.

The AA<sup>®</sup>100 Curtain Wall System, AA<sup>®</sup>720 Casement Windows and AA<sup>®</sup>720 Balcony Doors were used throughout the project and were chosen for their design flexibility and thermal performance. The Kawneer systems were installed on the project by approved specialist subcontractor APiC UK Ltd.

### REALISATION

Constructed by Kier Construction, the project plays a significant part in the Perry Barr Residential Scheme. It is part of a larger masterplan, which upon completion will provide over 1400 new homes.

Kawneer is delighted to have played a significant part towards the creation of this vibrant new neighbourhood.
